Fancy Leaved Caladiums

We must give credit to Dr. Henry Nehrling who first brought the Fancy Leaved Caladium to Florida and started to develop it for commercial use. Dr. Nehrling writes in his book "My Garden In Florida":

"The year 1893 may be properly called a red letter year of my life. It was the year of the World's Columbian Exposition in Chicago. Here I saw, for the first time in my life, masses of the new Fancy Leaved Caladiums. They came from the largest hybridizer of these brilliant foliage plants, Adolph Lietze in Rio de Janeiro. When I admired the richness and brilliancy of these often translucent colors, I was reminded of art, not of nature. My collections of various plants of all kinds of Fancy Leaved Caladiums surpassed them all.

"After receiving a few specimen bulbs, I started hybridizing and succeeded in developing many new varieties, which are today being grown in Florida in large quantities.

"In the summer my fields have been visited by thousands of people where I had a planting of 250,000 Caladiums every year and the admiration for these beautiful foliage plants by the visitors encouraged me to continue hybridizing and where I finally produced as many as 1500 new kinds. No pen or pencil can give an idea of the indescribable beauty of these colored masses when they are at their best. The color ranges from the purest white to the deepest red, and from the most delicate transparent bluish

and pinkish white to the deepest translucent claret, scarlet and purple."

Florida owes to Dr. Nehrling a reward that unfortunately his passing deprived him of receiving. In Florida there are about five million bulbs being produced every year. We, the American Bulb Co., are supplying bulbs throughout America and many European countries. This year there will be from three to five million bulbs distributed throughout America and foreign countries.

About 12 years ago, I personally introduced Fancy Leaved Caladiums in a large way. While many florists have grown them in a small way, today several hundred thousand bulbs go to the State of California to florists, as they have recognized it is one of the most valuable pot plants they can grow.

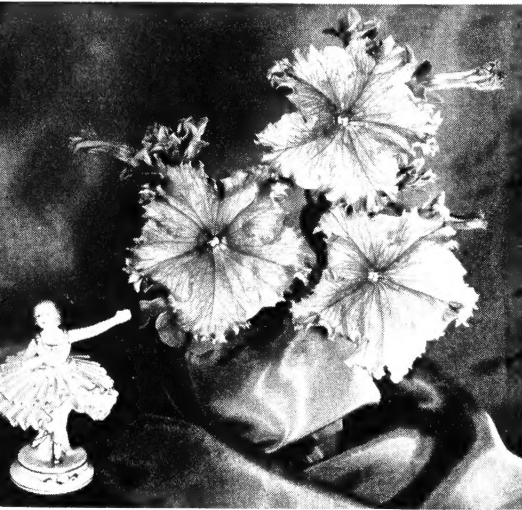

Many growers have seen the advantage of this beautiful foliage plant. It is being used for window boxes where it performs well all during the Summer in any climate. We, the American Bulb Co., compliment ourselves on the largest crop, having growers who grow for us exclusively the best selected varieties.

In 1954 we will introduce about 10 new varieties that are now in cultivation that we are developing stocks of. We assure florists, who are desirous of getting the latest and finest Fancy Leaved Caladium bulbs, that we can supply them.

RECENT INTRODUCTIONS

NEW CARNATION CUTTINGS FOR 1952

HARVEST MOON (Hill)

Disseminated by Joseph H. Hill Company, Richmond, Indiana beginning January, 1953. Restricted for 3 years. The name is very descriptive of the color, which is light orange-yellow. It is uniform in color across the flower, and throughout the year. It is a typical Sim variety except for color. [All orders will be filled in the rotation they are received.] \$150.00 per M—Minimum order 500.

JANIE (Baur-Steinkamp)

An excellent new salmon pink, a little lighter than Netta and larger. Janie was awarded the Dorner Memorial Medal (the highest award given a new variety) by the American Carnation Society at Dayton in 1951. The production and growth are good and there is every reason to believe that it will be the most widely grown salmon pink within a short time. Sold under a three year growers agreement: \$22.00 per 100, \$180.00 per 1000.

EXCELLENCE (Baur-Steinkamp)

The largest carnation we know of. The color is a medium salmon pink and the flowers are full and well formed. They reach a diameter of five inches regularly. Production is good considering the size and quality which command premium prices. Excellence was scored 89 points by the American Carnation Society at Dayton in 1951. Sold under a three year growers agreement. \$25.00 per 100, \$200.00 per 1000.

MOHAWK (Baur-Steinkamp)

Yellow variegated with pink stripes, brighter than Chief Kokomo. This is the finest variety in this color class that we have seen. The flowers are top quality and the production good. Mohawk will be a standard in all carnation plantings. Sold under a three year growers agreement. \$22.00 per 100, \$180.00 per 1000.

TOPPER (Baur-Steinkamp)

Rich velvety maroon, a shade deeper than Seth Parker. The flowers are full and well formed, long rigid stems. Scored 87 points by the American Carnation Society at Dayton 1951. A read good commercial crimson. Sold under a three year agreement. \$22.00 per 100, \$180.00 per 1000.

CRIMSON SPHYNX (Baur-Steinkamp)

A good bright crimson sport of our recently novelty introduction. The flowers are full and well formed. Production is very heavy. No restrictions. \$20.00 per 100, \$150.00 per 1000.

BING CROSBY (Catron)

New, parentage, cross of Orange Wonder and Puritan. Color, creamy yellow with rose pink feather edge, occasionally blotched with same color. Size, 3½ to 4" with high center. Good producer. Heavy stem and good stem length. Clear foliage. Very good keeper. Very little splits. Disseminated beginning December 1951 under three year grower agreement. \$20.00 per 100, \$150.00 per 1000.

SPICY ROSE (Sim)

A beautiful shade of vivid rose pink. A color lighter than that of Sidney Littlefield, but deeper and much brighter than that of Virginia Rose. A lively and appealing color. The flower is medium large, and of very attractive form. Plants are strong and prolific. Stems are long. Splitting is very slight. Keeping quality is good. Unrestricted.

\$20.00 per 100

\$150.00 per 1000

BUTTERSCOTCH (Sim)

Yellow-buff with slight pink tinting, but no lines or flaking, in center. Large, strong, prolific plants. Long stiff stem at all times. The first flowers are very large and full. Splitting occurs in the autumn, but is negligible after that. The size decreases during the winter, and the color is lighter, but the flower is still of good size, and the almost clear buff shade is attractive. It keeps splendidly. Is best grown in a warm location with all the light possible.

\$20.00 per 100

\$150.00 per 1000

BABY BRONZE (Sim)

Yellow or bronzy-buff with slight pink tinting, but no line or flaking, in the center, giving the bronzy appearance. The first flowers are almost clear buff, the tinting appearing in late autumn and continuing throughout the season. The flower is medium to small, but full and of beautiful form. The size remains uniform through the season. The stems are long and strong at all times. Plants are vigorous, and this is one of the most prolific varieties grown. There is no splitting. It is an excellent variety for corsages, boutonnieres and small floral arrangements. It keeps perfectly.

\$20.00 per 100

\$150.00 per 1000

RASPBERRY ICE (Sim)

White petals almost completely overlaid with pale orchid or lavender, the color closely resembling that of raspberry sherbet. The color is much lighter and softer than that of Pelargonium, and blends nicely in floral arrangements. It is a very attractive and popular variety. The flowers are medium large and of attractive form. Plants are bushy and prolific. Stems are long. Keeping quality is good. There is no splitting.

\$20.00 per 100

\$150.00 per 1000

RED BEAUTY (Sim)

A scarlet, very similar in color, form and size to Wm. Sim. The stems are long and are stronger than those of Wm. Sim. The plants are large, but not grassy. Production is good. There is very little splitting; probably less than with Wm. Sim. Keeping quality is excellent.

\$20.00 per 100

\$150.00 per 1000

YODER BROTHERS

WHITE

Jupiter. A large, strong-stemmed white.

Aurora. Another exceptionally large, white flower.

Adonis. A winter white. Satisfactory flower quality and good production.

PINK

Apollo. An outstanding salmon-pink. Should become the foremost salmon-pink variety grown.

Aphrodite. A clear light pink.

Diana. Light pink; a good producer.

Venus. A show variety, extra-large, beautiful, long-stemmed, salmon-pink flower.

ROSE

Minerva. An unusual deep scarlet-pink. Heavy break-back; fine keeper.

RED-SCARLET

Ceres. Beautiful King Cardinal color. Exceptionally high production. 1952. Early.

Neptune. Scarlet. A free breaker, fine stretch.

MAROON

Vulcan. A fine flower. Best maroon.

YELLOW

Midas. A good yellow.

VARIEGATED

Orion. Color resembles that of Growing Ember.

Saturn. A warm bronze variegated.

FOR BETTER ASTERS

In addition to using the best wilt resistant strains:

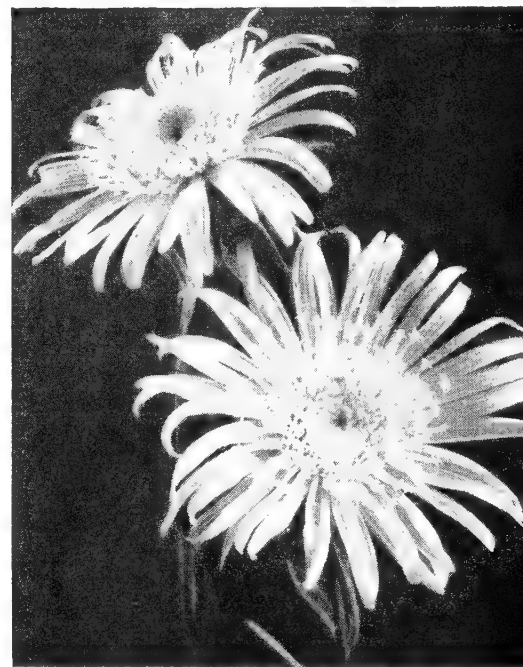

Set your plants in soil which has not had a crop of Asters on it recently or sterilize the soil.

Put your outside plantings in a cloth house to prevent leaf hoppers from bringing in Aster Yellows.

Avoid checking plant growth. Grow your seedlings in plant bands to prevent root injury in transplanting. See page 87.

Begonias FIBROUS ROOTED**LEADING LADY—NEW BEGONIA FROM GERMANY****DARK SHADES**—Rose pink to carmine.

Plants are perpetual bloomers and have excellent compact, low branching habit with attractive dark green foliage.

Extensive growers tests by leading pot plant growers last year brought us scores of letters of approval and requests for more seed. Typical of the comments was the following from Robert Craig Company, Inc., Norwood, Pa., "They are the best of any Begonias grown from seed

that we have ever seen. We would like you to send us sufficient seed for 5000 plants."

Be sure to make a sowing of this sensational new Begonia very soon. We have a limited quantity of seed available in Dark Shades. Greenhouse grown seed.

Larkspur

In northern states an outdoor sowing in early September will give the best blooms in the Spring, however if sown as early in the Spring as the ground can be worked, fine spikes may be obtained. Sowings are usually made in January for a crop under glass.

The base branching types are the best for cutting. For supreme quality try the new Regal, Supreme or Super Majestic Strains.

REGAL

Very long spikes of huge well spaced florets make this new strain of Florist's Market larkspur distinctive. Some flowering trials proved this strain to be superior.

RECENT INTRODUCTIONS

F1 HYBRIDS

Barbara (Yoder). A new bronze with long spikes, large florets with bright bronze lips, pink throat. Very early.

Indian Summer (Weddle). Medium bright bronze, lighter than Lady Dorothy. Early, yet strong and vigorous with strong stems and spikes with medium-size florets well spaced.

Jubilee (Winkler). A light apricot-bronze. Similar in shape of spike and growing habits to Goldrush.

Mountain Pink (Weddle). Clear medium-pink color identical to that of Cheviot Maid. Slightly later than Christmas Cheer. The first strong-growing hybrid in the medium-pink class.

Patricia (Yoder). Deep yellow hybrid, has Margaret characteristics of form and growth. Early.

Red Wing (Weddle). Deep velvety red. Far superior to any line-bred red snapdragon and equal to any hybrid introduced so far.

SELF-POLLINATED

Pamela Pink (Gilbert). An early winter-flowering variety. Good live medium pink with long flower spikes, very good stems and nice clean foliage.

Schumann's White. Has all characteristics of Schumann varieties. Large close-flowering pure white head, sturdy stem, no excess foliage, and will not shatter.

Snapdragons

Tetra Snaps

TETRA MIXED (2 to 2½ feet)

The most satisfactory outdoor Snapdragon. Being a tetraploid, it is a vigorous grower, almost never crippled with rust, and these big husky plants sell quickly from flats. Florets are huge, mostly ruffled, and stay on the stem so that 12 inch flower spikes are usual. Colors cover the full range, with a majority of flowers richly veined.

A SUPERIOR NON-BRANCHING STRAIN

The one enormous spike produced by this strictly non-branching type permits close planting and makes a most profitable greenhouse crop for spring cutting.

Our seed is grown for us by specialists who through careful selection and special trials do everything possible to insure your getting a high percentage of doubles.

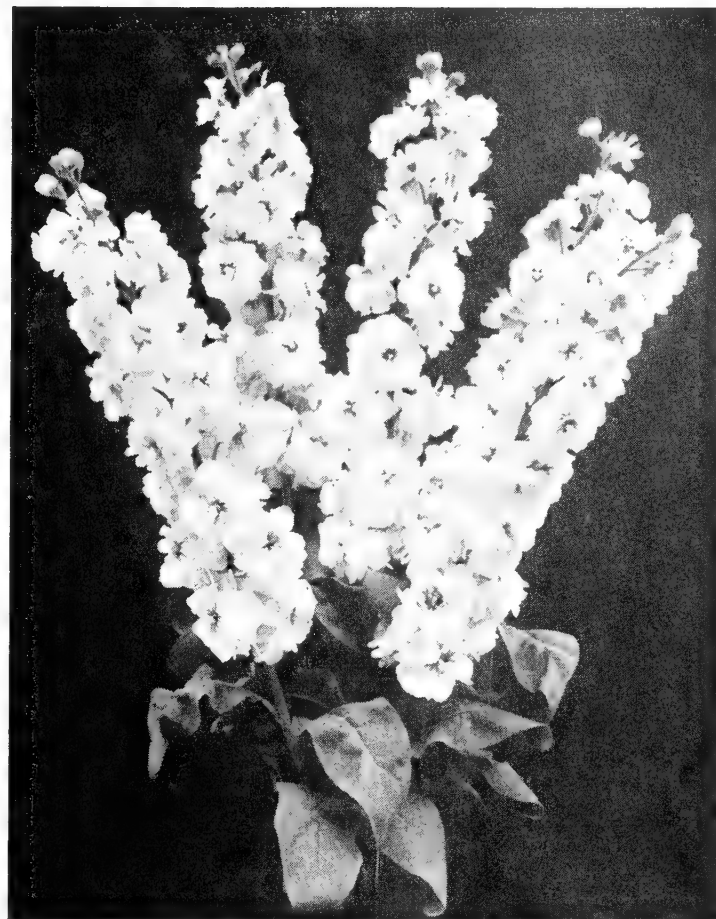

Make successive sowings for a continuous supply of fine spring cut flowers. Grow cool (below 60°) to prevent blindness.

SPRING FLOWERING (Cuthbertson) SWEET PEAS

Unexcelled for spring forcing and outdoor culture

The spring-flowering types give a much heavier crop of longer stemmed flowers than the standard early-flowering types but come into bloom a little later. Seed should not be sown before October in the greenhouse for flowering during March, April and early May. Sown early outdoors they are superior to, and come into flower earlier than, the standard summer flowering varieties.

A. B. C. LAWN SEED MAKES "Beautiful Lawns"

★ There is no substitute for quality in grass seed. Into the A. B. C. Mixtures are blended the finest available heavy weight seed—seeds of hardy perennial grasses that produce a deep-rooted permanent turf of real beauty.

Each year more florists and landscape gardeners sow our mixtures for best results. Despite the unstable, high prices of fine grasses, our formula has remained the same year after year except that we are now omitting clover as explained below.

A. B. C. SUNNY MIXTURE

Heavy weight Kentucky Blue Grass and Fancy Red Top blended with other fine grasses make this mixture outstanding.

	Per lb.		Per lb.
1 to 25 lbs.	90c	50 lbs.	88c
25 lbs.	89c	100 lbs.	87c

Sow 1 lb. of grass seed to 200 sq. ft.

150 pounds to one acre.

Many of our customers prefer mixtures without clover therefore we no longer include it in our mixtures. For those desiring clover we offer the finest grade of White Dutch Clover separately below.

Better results and more even distribution can be obtained by sowing clover separately. Use 4 ounces to every pound of grass seed sown.

A. B. C. "SUPREME QUALITY" GLADIOLUS BULBS

Grown Exclusively for Corms

For stock that incorporates the required vitality to produce real results, A. B. C. "Supreme Quality" Gladiolus Bulbs are recommended to the grower. With a total output of bulbs produced exclusively for bulb harvest only from young corms, we are ready to meet the requirements of growers who desire high quality at a fair price.

Grown Under Close Supervision

Bulbs furnished by us are produced in sandy loam ideal for their culture and are thoroughly cured before shipping. Our growers hold Agricultural Inspection Certificates that assures you the bulbs are free from thrips and other diseases.

STRONG NORTHERN GROWN — TRUE TO NAME

DORMANT ROOTS, 3 to 5 Eyes

Our Canna roots are strong, healthy, true Northern Grown. The varieties listed below have proven indispensable where large exhibition showings are needed. Early ordering is suggested, because of the great demand this year.

City of Portland. Deep pink. Green foliage 3½ feet. Extra good flower. Does not fade.

Copper Giant. Green foliage about 3½ feet tall and a very vigorous grower with large clear pink flowers.

Dorothy S. A new dwarf continuous flowering clear salmon red Canna. Produces large flowers and grows about 4 feet tall. Very vigorous and drought resistant.

Hungaria. 3½ feet. LaFrance pink.

King Humbert. This remarkable Gold Medal Canna has been the sensation of the past ten years and is the greatest favorite today. Handsome, broad, tropical foliage. Scarlet flowers; bronze leaves. 4 feet.

The President. 4 feet. This immense new flaming scarlet has come into wider use more quickly than any other Canna. The President leads the red varieties in the quality and also the quantity of its bloom. The foliage is rich green and burn-proof in the hottest weather.

Rosemond Cole. Green foliage grows about 3 feet tall has a large Variegated red and orange flower and is a vigorous grower.

Yellow King Humbert. 4 feet. An orchid-flowering sport of the well-known King Humbert. Flower a deep, rich yellow, softly spotted and blotched with bright red. Some plants occasionally give a scarlet or scarlet striped flower, which we consider an improvement rather than a detriment. Green foliage.

MISCELLANEOUS BULBS FOR SPRING

Double Flowered Tuberous Rooted Begonia

Gloxinias

Our bulbs are of the highest quality grown for us by the best growers in Belgium. We offer superior varieties especially suited to greenhouse culture in the following colors:

GLOXINIA CULTURE

Gloxinias are fit companions for the tuberous rooted Begonias and the fancy leaved Caladiums. Their richly colored flowers are most outstanding. Start the tubers in 4-inch pots in a mixture of leaf mold, sand and a little well-rotted cow manure with good bottom heat. Keep shaded and as the leaves appear, be careful with the watering. You cannot do it with the hose, so make use of the old-fashioned way, the watering can, and go over each plant carefully, examine every one and don't apply water unless it is needed, on the other hand, they suffer every bit as much if they don't get water when ready for it, for they want a moist soil. Keep the leaves dry. It doesn't hurt to get them moist on a hot day early in the morning, but they soon go if you wet them every time you water the plants. They want a little shade most of all, but if you overdo it you may obtain foliage but no flowers.

Begonias

TUBEROUS ROOTED BEGONIAS

Belgian Grown

Large Flowering Type

With its bright colors, richness of foliage and easy culture it has become a favorite with the public in gardens and homes.

CULTIVATION. The begonia prefers partial shade and not too warm a place where they will give best results specially in wet summers. For cultivation in greenhouses, shade is necessary.

Forcing can be started in February, March or April, depending on the time they should be in flower. The bulbs are placed in boxes, on light porous soil close together, and then covered with earth to a depth of one inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs.

When the plants begin to develop place them in pots.

A.B.C. Mum cuttings are rooted by specialists under ideal conditions to produce a vigorous root system. They are packed in specially designed cartons and rushed to you by express to insure their reaching you in perfect condition.

**TERMS OF SALE**

1. The minimum total order that can be accepted is 500 cuttings.
2. Fifty of each variety is the minimum that can be supplied.
3. More than 50 of a variety must be in multiples of 50.
4. No C.O.D. orders.
5. **SAFE ARRIVAL** cannot be guaranteed. All shipments must be in satisfactory condition before being accepted by the common carrier. Our responsibility ceases upon receipt of shipment by their agent. If shipment arrives in bad order, i.e., broken, frozen or heated, call your express agent, have him inspect shipment and mark condition on the express receipt. Customer must file claim against the common carrier.

SUBSTITUTIONS—Our growers will substitute equal or better varieties for items not available unless order is marked **NO SUBSTITUTIONS!** To avoid substitutions, place your order 6 months before delivery date.

CHANGES OR CANCELLATIONS on orders must be received at least 30 days before shipping date!

DISCOUNTS—2% for cash with an order for plants.

AIR SHIPMENTS—If you live in or near a city with air service, check the rates. In many cases you will find them almost as cheap as railway express rates and delays in transit will be avoided.

We, the American Bulb Company, act as agents for the growers, and we do not warrant in any way, expressed or implied, the description, quality, productiveness or any other matter of any cuttings or plants sold by us. We, further, will in no way be responsible for failure to deliver on dates requested.

If the customer does not accept the goods on above terms he must return them at once, and money will be refunded or proper credit given. We exercise, however, the greatest care to fill our orders with the highest quality possible, as it is our constant aim to give our customers fullest satisfaction.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of orders, and we reserve the right to advance prices without notice.

WHITE

LYRIC Oct. 5. Pure white intermediate daisy. Short compact habit; very uniform and showy. Very durable. An excellent early pot plant or fine dwarf garden type.

HORIZON Oct. 5. Pure white intermediate pompon. Stronger plant than White Wonder. Whiter and more double than Chris. Columbus. Larger, showier than Classic. An important early cut flower or landscape variety.

NORONA Oct. 15 (DE PETRIS). White, medium solid pompon. Very desirable for earliest shading under black cloth. A very free and productive variety possessing good growth habit. Use in place of Irene for early shading in the cloth house.

WHITE POPCORN Oct. 25. Cream white sport of Popcorn. No trace of pink in the flower at low temperatures. The most productive white pompon.

KEEPSAKE Oct. 25. Cream white pompon. About the size and form of Popcorn. Hard, durable flower. Taller and freer growth than Popcorn. For May through July in the greenhouse and August and September in the cloth house. Prompt and uniform response to shade.

MOGUL (DE PETRIS) End of September and early October. Garden variety. Vivid orange rust full decorative of medium size. Vigorous upright growth with strong stems and petioles.

BRIGADIER (DE PETRIS) Oct. 1. Garden variety. Large carmine red pompon. Solid blooms of decorative form. Good bushy growth and excellent foliage. Stems strong 20" to 24". Matures October 1st. A nice lively color and quite early.

AVALON (DE PETRIS) First week in October. Garden variety. Formal pompon of glowing bronze color. Good stems and foliage with upright growth. Resembles Mme. Chiang Kai Shek in color with an improved growth habit and blooms one week later.

FIRECRACKER Oct. 5. Mahogany bronze decorative close to burnt orange. Tall, cut flower growth. The flower holds color well and is quite frost resistant.

PANORAMA (DE PETRIS) Oct. 8. Garden variety. Dazzling orange rust, small decorative 36" to 39". Small glossy foliage, of upright growth habit and fairly good for cutting.

BLUEBLOOD Oct. 10. Deep amaranth red decorative. Vigorous cut flower growth. Color strongly resembles that of the old variety Burgundy.

CARAVAN Oct. 10. Large salmon bronze decorative, garden type compact rugged growth. Has all the good qualities of Mrs. DuPont, with a strikingly new and useful color.

WILSON'S WHITE Nov. 1. (IAN WILSON). Intermediate incurved. Outstanding white standard for pots.

MADONNA Nov. 5. Intermediate white pompon of good clean growth. Variety just precedes Encore. Its place is in the spring program in May and June where it takes high temperature well. Will show light pink tinges at low temperatures.

DYNAMO Nov. 10. White pompon. Very similar to Encore but greatly improves that variety in growth habit. Very high quality cloth house white pompon. Fine in May and June in the greenhouse.

SCULPTURE Nov. 15. Large ivory white daisy. Excellent in May and June. Very close to a White Valencia for cloth house, responding much faster than that variety and with considerably better production.

ESKIMO Nov. 15. Clear white daisy. Fine form and excellent substance. Stands cloth house adverse conditions well. Very fine keeper and a very durable flower.

MONARCH Dec. 1. Ivory white large decorative. Larger, harder flower than Cameo. Clean, vigorous growth. Responds rapidly and uniformly.

BRONZE AND RED

ADMIRAL Oct. 12. Dark crimson red decorative. Plant is more vigorous and productive than Red Velvet; color is deeper and holds well.

COCKTAIL Oct. 15. Salmon orange pompon—a beautiful color. Growth is slow, variety attains medium height. A new color and distinctive form. A cut flower variety.

RAJAH Oct. 15. Large scarlet red daisy. Very fine as cut flower. Holds color well in the field or early cloth house. Excels Red Daisy in color and growth habit.

BUCCANEER Nov. 1. Rich bronze daisy with very little fading even under high temperatures. Fine growth and production. Darker and richer bronze than Buckskin or Sylvanna. This variety fills a long felt need.

NOMAGO Nov. 5 (DE PETRIS). Bronze spider; the best of the bronze spider varieties.

ILLINI BURMA Nov. 10. (UNIV. OF ILL.) Light bronze; large pompon. Responds well to disbudding and partial disbudding. Satisfactory as a pot plant. Stiff stems and uniform, above average production.

BR. LINDA LOU Nov. 10. An important color sport of Linda Lou.

ILLINI RYE Nov. 12. (UNIV. OF ILL.) Straw color intermediate pompon. Exceptional substance and stem strength. Very uniform. Shades well.

ACCLAIM Dec. 5. Large formal type pompon. Clean Omega type growth, no laterals. Follows Paramount and Fortune. Lights and shades well. As fine a formal pompon as exists. A white Corsair.

COTILLION Dec. 5. Intermediate semi-formal pompon. Very clear white. Heavily petalled, extreme substance. Short, easily controlled growth. Responds well and cuts uniformly. A late Encore with a very hard flower.

SNOWDROP Dec. 8. (DE PETRIS) White button pompon with uniform growth and good production. Stems are strong and flowers possess a fairly good substance.

SNOW QUEEN Dec. 10. (DE PETRIS). Medium large formal white pompon of the purest white. Possesses very good substance. Sprays produced on good stems are well flowered. Good healthy and free growth. It is not vegetative. Not recommended for shading.

SATELLITE Dec. 15. Ivory White, formal, intermediate pompon. Vigorous Silversmith habit. Very high class flower, especially brilliant under artificial light. Responds slowly but uniformly.

SHALIMAR Nov. 15. Lively orange bronze anemone. Short compact habit well suited to pot plant culture or cut flowers. Sprays well or attains good size, disbudded in pots. A useful improvement over Gypsy. A valuable variety to shade or delay.

BRONZE PRINCETON Nov. 15. Bronze sport of Princeton. Distinct from Red Princeton.

AMBERINA Dec. 1. Bright orange bronze intermediate decorative. Vigorous, clean growth. A late Princeton with very high production. Responds well and grows dependably under most any temperature or light condition.

HARLEQUIN Dec. 10. Crimson red intermediate decorative. Vigorous wiry growth. Excellent low temperature variety. Fast, uniform response.

TOPAZ Dec. 15. Warm, orange bronze single. Heavily petalled with good substance and vigorous free growth. Will not go blind. Bronze, generally believed to be of slight value at this season, finds in Topaz a very brilliant color which is striking under artificial lights.

POINSETTIA Dec. 20. Scarlet red large daisy. Strong growth. Needs no disbudding. Attain the size of the Valencias on natural sprays. Responds uniformly, takes low temperature well. A most important addition to the Christmas season.

PINK

ENTERPRISE (DE PETRIS) First week in October. Garden variety. Rich amaranth pink, solid pink pompon suitable for cutting. Good stem and foliage. Medium tall growth.

COURTIER Oct. 10. Lavender pink decorative. Garden type, compact growth. Beautiful color and form. A Spellbound that is very frost resistant. Good as an early pot plant.

LASSIE Oct. 10. Large dark pink decorative similar in size and form to Lavender Lady. A strong, upright habit well suited to cutting. Holds well on the plant.

ELIZABETH HOOD (DE PETRIS) Oct. 12. Garden variety. Vivid lavender pink, large full pompon with excellent substance and spray formation. Excellent strong stems 30" to 56" long of vigorous growth with very healthy habit and lush foliage. A very fine and productive variety. Excellent for cutting or for pots.

MISS CLARINDA (HOLMES) Nov. 10. Light lavender shading darker toward center. Color and flower size resembles the variety Mrs. Bulkeley, but production and growth is far superior.

PANDORA Nov. 10. Large luminous pink decorative. Excellent size and form. Growth is vigorous and fast, with short timing giving best results. Well suited to spring and cloth house flowering.

MEMORIAL Nov. 12. Intermediate pink anemone. Excellent spray and growth. Improves the variety Linda Lou in substance, color and growth. Recommended April thru November. Holds color well. A pink Little America flower, with a much cleaner and more vigorous growth habit.

MERMAID Nov. 15. Intermediate pink daisy. An excellent variety to follow Reward. Fine growth and production. Holds color well. Heavy petallage and good substance.

GRAND SLAM Nov. 20. Brilliant silvery pink daisy. Large flower, wide stiff petals. The variety responds well to shade. Growers will enthuse over its quality and production. Retailers will find in it the nearest color to shell pink aster yet found in the chrysanthemum.

VIVACIOUS LADY Nov. 20 (HELM). Spoon type novelty. For growing in sprays as well as disbuds.

PRINCESS Nov. 25. Small pink pompon. Very lively color, hard well rounded flower. Growth and production nearly identical to Snowflurry. Responds more uniformly than any variety.

HERITAGE Dec. 1. Large formal dark pink pompon. Free, vigorous growth, good production. Improves the production of Minuet and responds more uniformly than Riviera or Minstrel.

YELLOW

MOONLIGHT (DE PETRIS) Mid-September. Garden variety. Vivid soft yellow formal decorative about 3 inches across. A very full solid flower with excellent lasting qualities. A free growing variety which may be grown into compact plants by pinching or allowed to grow into a cutting variety. Good stems and foliage.

GARLAND Oct. 5. Intermediate yellow daisy. Compact vigorous growth. Garland has an exceptionally durable flower. A good early pot plant well adapted to gardens.

GOLDRUSH Oct. 10. Yellow daisy. Vigorous 3" growth. Resistant foliage. Good cut flower production.

TREASURE Oct. 10. Small yellow pompon. Vigorous, upright habit. Fine cut flower growth. Flower is a small version of Gold Coast and very durable.

NYTODA (DE PETRIS) Oct. 12. Garden variety. Color golden Apricot. Makes good sprays on strong stems 30" to 36". An excellent daisy with healthy growth and fairly good production. A good cutting variety.

SUNUP Oct. 28. Small deep yellow pompon. A little smaller than Gold Coast and larger than Pixie. Harder and more durable than Gold Coast. A good producer which withstands high temperatures and heavy cropping better than Gold Coast. Recommended May thru October. Sharp uniform response.

DK. IND. YEL. (pots) Nov. 5. For pot plant use only. Somewhat shorter in growth habit than Ind. Yellow.

BRIGADOON Nov. 5. Bright heavily petalled Yellow Daisy. Excellent growth and production. Responds rapidly and uniformly. Wholesale shippers will welcome this type of daisy. Good May through October.

THOROBRED Nov. 15. Large yellow daisy. Good growth habit, fine production. Very easily grown. Excellent form, petallage and substance.

PIPPIN Nov. 20. Intermediate yellow pompon. Follows Lollipop and precedes Sunnyside easily making Thanksgiving. Variety produces heavily on compound sprays. Shades well and lights well. Very dependable.

LOLLIPOP Nov. 20. A lemon yellow pompon. Very formal, round, and hard. Has a long season of usefulness. Fast response, and good production. A very reliable 11 week variety.

YELLOW USONA Nov. 25. A rich yellow sport of White Usona. Typical in flower and growth to the Usona variety.

GOLDENROD Nov. 25 (DE PETRIS). Full round and solid yellow pompon with exceptional substance and keeping qualities. Can be kept on the plant for a long time without impairing the color, substance or form of the flower. Gives a heavy production of high quality sprays.

HIGHLANDER Nov. 25. Intermediate formal decorative. Better production and freer growth than Goldsmith. Highly dependable for production and quality. Very close to a Yellow Highbrow.

YELLOW PRISCILLA (NEAL) Nov. 25. Deep lemon yellow, sport of the all time favorite Priscilla.

YELLOW VALENCIA Nov. 28. This is the sport of Valencia which was formerly known as Golden Jane.

YELLOW MOELLER Dec. 3. Sport of Margaret Moeller.

BRANDYWINE Dec. 5. A deep orange yellow decorative. Excellent growth habit similar to that of Yuleflame. Season December through February.

JACK-POT Dec. 5. Very large golden yellow decorative. A new peak in growth and form of flower has been achieved in this variety. It responds sharply and requires no disbudding. This variety approaches perfection in yellow pompons.

GOLDTONE Dec. 5. A heavy-petalled yellow single. Best described as a yellow Christmas Star. A good variety for flowering October 15 to March 15. Tolerates wide temperature range.

YELLOW SNOWCREST Dec. 15. A clear yellow sport of Snowcrest.

REVELRY Dec. 20. Intermediate light yellow decorative resembling Yellow Revelation with an improved flower quality. A dependable late, low temperature productive variety.

TERMS OF SALE

1. The minimum total order that can be accepted is 500 cuttings.
2. Fifty of each variety is the minimum that can be supplied.
3. More than 50 of a variety must be in multiples of 50.
4. No C.O.D. orders.
5. **SAFE ARRIVAL** cannot be guaranteed. All shipments must be in satisfactory condition before being accepted by the common carrier. Our responsibility ceases upon receipt of shipment by their agent. If shipment arrives in bad order, i.e., broken, frozen or heated, call your express agent, have him inspect shipment and mark condition on the express receipt. Customer must file claim against the common carrier.

SUBSTITUTIONS—Our growers will substitute equal or better varieties for items not available unless order is marked **NO SUBSTITUTIONS!** To avoid substitutions, place your order 6 months before delivery date.

CHANGES OR CANCELLATIONS on orders must be received at least 30 days before shipping date!

DISCOUNTS—2% for cash with an order for plants.

AIR SHIPMENTS—If you live in or near a city with air service, check the rates. In many cases you will find them almost as cheap as railway express rates and delays in transit will be avoided.

We, the American Bulb Company, act as agents for the growers, and we do not warrant in any way, expressed or implied, the description, quality, productiveness or any other matter of any cuttings or plants sold by us. We, further, will in no way be responsible for failure to deliver on dates requested.

If the customer does not accept the goods on above terms he must return them at once, and money will be refunded or proper credit given. We exercise, however, the greatest care to fill our orders with the highest quality possible, as it is our constant aim to give our customers fullest satisfaction.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of orders, and we reserve the right to advance prices without notice.

Carnation . . . Rooted Cuttings 1951-1952 Season

A. F. S. RED RUBBER FABRIC STERILIZING CLOTH

A new high grade material

After years of testing various types of materials our factory has now come up with this fine material for covering benches when steam sterilizing.

Withstands steam and sunlight. Airtight and tough, yet very flexible. Will not mildew, lasts for years. Quickly rolled up and bundled. Fabric does not tear easily nor crack. It can be cleated to sides of bench if desired.

Made of a special red rubber fabric. Comes in two standard widths, 6 ft. or 8½ feet, and can be cut to any length. Weight is only 15 oz. a square yard. Send for free sample.

6 ft. wide. Per lineal yard.....\$5.00
8½ ft. wide. Per lineal yard..... 7.50

Shipped promptly from the factory in Philadelphia.

CLOTH FOR SHADING AND CLOTH HOUSES LONG LIFE SARAN CLOTH HOUSE

SARAN, the new material for cloth houses, is fast making the old cotton cloths obsolete. SARAN is a plastic screening made by Dow Chemical Co. and will outlast copper screening, giving 8 years service. Non-inflammable and practically waterproof. Air circulates freely through its fine mesh with 73% light filtration.

Our SARAN houses are sewn with an orlon thread which is guaranteed for the life of the cloth. SARAN does away with all storm dangers—no

more rips or tears from rain and wind.

Based on a made up cost of 42½¢ per square yard, a SARAN Cloth House will cost you approximately 5¢ per square yard per year; this means SARAN is the lowest cost cloth house on the market today.

SARAN is available either in green color or natural aluminum color. The aluminum color reduces the temperature in your house approximately 10%.

A little more cloth than the actual measurements of the frame, as additional material is needed for rolling around the wires and for slight variations in fitting the cloth to the frame when sewing.

AMERICAN BLACK SHEEN SHADING CLOTH

For shading early Chrysanthemums. This well known fabric is the leader in the field and has been proven by test over the years to give extra years of service and reduces costs to a minimum.

American Black Sheen is guaranteed fast black, and is closely woven, treated, and pre-shrunk to keep out the light. It is 38% heavier than the average minimum prescribed for shading. It produces 99% darkness.

Available in bolts 36 inches wide or cut to any length. It can be sewn to any width in multiples of 36 in.

Note: There is a loss of about 2 inches per yard in width because of shrinkage in preparation and overlap in sewing, so be sure to allow for this in estimating the width of cloth needed. Unsewed. Per yard.....*60½¢ Sewed. Per sq. yard.....*65¢

*MINIMUM CHARGE ON CLOTH ORDERS

Because of the expense of handling orders for small amounts of cloth, it is necessary to add a charge of \$2.00 on all orders for less than 100 yards.

TEMPERATURE ALARM "Standard"

The Standard Temperature Alarm is an automatic device to warn of abnormally high or low temperatures in Greenhouses.

In places where heat is provided through automatically operated oil burners or stokers, and there is an ever present danger of loss of heat through mechanical or electrical power failure, installation of the Standard Temperature Alarm assures an automatic warning in case of failure. Where hand fired heaters are installed, a Standard Alarm provides an automatic check-up on human forgetfulness or oversight. These Alarms will guard against low or high temperatures twenty-four hours a day.

One cold snap or breakdown might cost you hundreds of dollars which could have been prevented, had you had sufficient WARNING. Watchdog of the greenhouse. Write for illustrated circular.

TERRA-LITE Brand VERMICULITE

Terra-lite is mineral mica, heat processed at 2000° F. to expand it into a light, sponge-like substance. Terra-lite retains a large amount of air in its microscopic crevices, yet can absorb several times its weight in water. It is not a fertilizer. It is a highly versatile growing medium that does not rot, sour or flake. Terra-lite is sterile—free of diseases, insects and harmful chemicals.

ALL THESE USES

Starting Seeds. Perfect air-moisture control for speedy, dense root growth. High rate of germination, seeds easily plucked out for transplanting.

Rooting Cuttings. If you do rooting from cuttings you'll be amazed how quickly they develop in Terra-Lite, what masses of hair roots cuttings have.

Mulching. Protection for shrubs or plants, winter or summer.

Lightening Heavy Soil. Aerates, breaks

up tough soil, lets roots spread out. Fine for sandy soil too.

Transplanting. Mix Terra-Lite in your soil before transplanting cuttings, seedlings, bushes, shrubs. Regular air-water feeding to roots.

New Lawns. Terra-Lite improves lawn soils through aeration, stops caking, eases watering problems.

Storing Bulbs. Ideal for this use; keeps bulbs firm and plump, prevents rotting.

DELTA DISPENSER—Fertilizes and Waters in One Operation

Regardless of the consistency of the liquid fertilizer you use, with the Delta Dispenser you will feed more evenly and more economically.

To operate you simply fill the container with the plant food of your choice, adjust the mixture control to the recommended mixture and turn on your water to the desired flow. When you have spread the exact amount of fertilizer desired, a turn of the shut-off valve will close the food supply line without diminishing your water volume. The Delta Dispenser can be used just as efficiently for applying insecticides.

With the Delta Dispenser there is no costly waste of time when changing from feeding to watering.

GREENHOUSE WEED CONTROL

Requests for recommendations on methods of controlling weeds in the greenhouse are often received. The best means of weed control in bench or potting soil is sterilization. For situations where this is not practical, the Goodrich Chemical Co. have developed the two products listed below.

NIX

A water-soluble weed killer that destroys whatever soft, succulent vegetation that it wets. Effective on both grasses and broad-leaf weeds when small. By directing the spray, NIX can be used to eliminate small weeds from between growing crops.

4 lbs...\$3.96 25 lbs...\$22.25 225 lbs...\$155.25

OKTONE

A fast-acting weed killer which kills most vegetation on which it is sprayed but does not kill underground parts of plants, seeds or bulbs in the soil. Mix with oil as directed. A safe pre- and post-emergence weed control, and valuable for clean-up of walks and under benches.

A Striking Example

The untreated flats rotted almost to a powder. The others which had been given a quick dip in Cuprinol, were "as good as the day they were dipped." This is the report of a two-year test by a State Agricultural College.

GLASS CLEANER—"Lite-ning"

This scientific glass cleaner, made by the Garland Co., works instantly, dissolving the hardest crust of dirt, grease, soot, scum, or shading. Clean glass allows 30% to 60% more light to pass through. Under ordinary conditions dissolve ½ pound of Lite-ning crystals in one gallon of water. For exceptionally dirty glass, use one pound of Lite-ning to one gallon of water. Brush on glass, then rinse off with water. Will not injure plants or putty.

SOIL EQUIPMENT, GLASS SUBSTITUTES, ETC.

SOIL HEATING EQUIPMENT

"General Electric"

General Electric—the very best in Soil Heating equipment. Sturdy lead-covered cable and heavy duty thermostats, built to last.

This flexible heating cable can be used in hot-bed, cold frame or greenhouse bench. By applying "bottom heat" it provides positive control and faster stimulation of growth. Soil can be maintained at 15° to 20° F. above general house temperature.

One 30-ft. cable (110 volt, 180 watt) heats 18 sq. ft. of bench area.

One 60-ft. cable (110 volt, 400 watt) heats 36 sq. ft. of bench area.

One 120-ft. cable (220 volt, 800 watt) heats 72 sq. ft. of bench area.

Thermostat Model A is a simplified type and will control one or two 60-ft. cables, or six 30-ft. cables.

GLASS SUBSTITUTES

These are excellent substitutes for glass and can be used in many ways by the florist: For greenhouse partitions, hot bed covers, covering outside beds, etc.

All the materials must pass durability tests. In hot Southern climates, however, it has been our experience, that SCREEN-GLASS is the only material that can be wholeheartedly recommended since it will not break down under the heat and will continue to transmit the sun's rays necessary to plant growth.

Screen-Glass

Wire screen cloth imbedded in clear, waterproof plastic which transmits the ultra-violet rays. Lets in heat better than glass. 36" wide.

50-ft. roll **\$18.50**
100-ft. roll **36.00**

Vitapane

Crystal clear material with cross-cord reinforcement. Admits over 60 percent ULTRAVIOLET RAYS. Has many uses in greenhouses, cold frames, as plant protectors, etc. 36" wide.

SOIL SHREDDERS THE NEW IMPROVED LINDIG

The new Model B Lindig Soil Shredder is equipped with a newly developed ACTIONIZED shredding blade,

made of a special steel to resist the most severe wear. Each shredding blade is free swinging. The stationary blades are individually mounted with a spring on each blade. This feature allows only the required opening to be made for a non-crushable object to pass through the shredder, and is found only in the Lindig patented soil shredder.

The new Model B shreds faster and more uniformly all soils, peat, manure, compost piles, leaf mold, sphagnum moss, shingle tow, and sods.

Model JR-B. For the small grower or as a second shredder for the large grower to use on the potting bench. Height 27", length 36". Hopper size, 15" x 15". Rotor 7" wide with 3 sets of blades.

MERRY TILLER

A Lightweight Rotary Cultivator for Garden or Greenhouse Bench

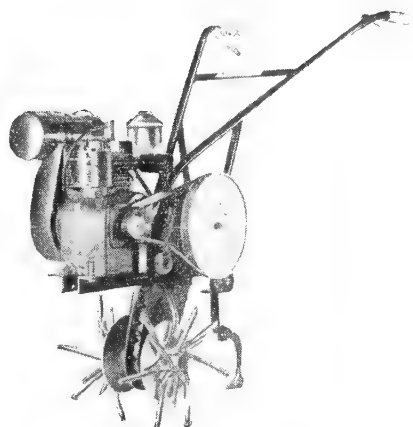

Light enough in weight for ease of operation and for convenient use in the greenhouse, yet very sturdy and reliable. Simplicity of construction insures dependability and long life.

Power is delivered directly to rotors—circular steel discs to which tough, protruding tines or teeth have been welded. There are no "wheels" in the usual sense.

The operator simply retards the forward progress by sinking the cultivator tooth at the rear of the machine into the soil. This forces the rotor teeth to thoroughly stir, mix and mulch the soil at the desired depth while continuing to move slowly forward.

Action photo showing how the Merry Tiller completely mulches the soil.

SPECIFICATIONS

Motor: 1 1/2 h. p., one cylinder, air-cooled gasoline motor.

Rotors and Rotor Teeth: Cold rolled steel tipped with Stellite (an extra hard surface material).

Cultivating Depth: Up to 10 inches.

Cultivating Width: With standard rotors, 12 inches; with double rotors, 24 inches.

Full Power single outside reduction.

STRING-KING WIRE WINDER

**MAKES YOUR TOUGHEST JOB EASY!
MAKES YOUR LONGEST JOB FAST!**

This precision reel wire winder, mounted on portable stand, will more than pay for itself in one season in time and man hours saved. Stringing wire over one floral bed is reduced from more than a two-hour job to just 20 minutes! Wire is kept straight; no more unkinking as you string or un-string wire. Turns one of the most disagreeable chores into speedy routine!

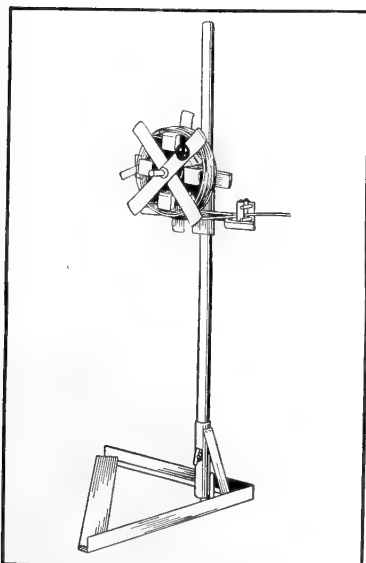

PORTABLE stand set at end of bench allows operator to advance length of bed with wire kept straight and true. Special spring brake insures proper unwinding of wire. Removable reel easily loaded with added wire for next row.

NO KINKS in wire keeps florist working as fast as he wishes. No more bruised fingers in straightening knots and twists as he proceeds along the bench. Wire is flat, ready to lay or tie. Reeling in, friction guide keeps wire taut—no backlash.

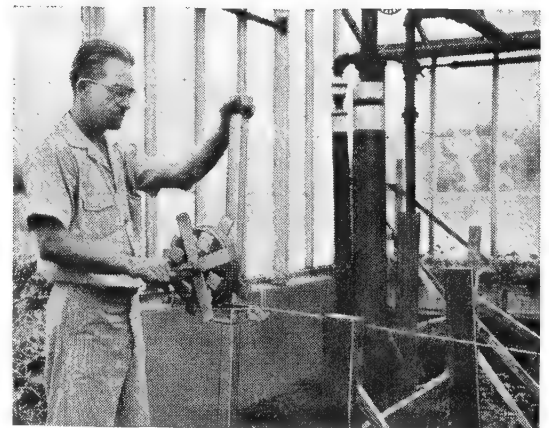

NEAT ROLLS of wire are assured every time for easy storage. The right size to use again and again—easily attached to disengage spool. Although readily portable, durable steel stand is built to endure years of rugged service.

WIRE WINDER, complete.....\$28.50

BIRD Plant Bands

Vita-Band D

THE NEW Disintegrating VITA-BAND HEALTHIER CROPS . . . LESS LABOR

Contains root growth until grower chooses to let root through Band. Only quick, slight pressure is needed to crack Band. Do not remove Vita-Band D when transplanting. Band disintegrates in the soil permitting free growth of roots from time of transplant. Nutrient-treated with quickly available plant food.

Vita-Band 10

For short growing periods. Will usually contain root growth up to approximately 8 to 10 weeks. Nutrient-treated with quickly available plant food . . . your judgment determines need for additional feeding. Vita-Band 10 is identical to Vita-Band D except Vita-Band 10 is removed at time of transplant. Vita-Band D is not.

1952 A.F.S. BLUEBOOK

The Complete Guide to All Horticultural Supplies

SUPPLIES ARE SHIPPED FROM CHICAGO

All items of florist supplies listed in the A.F.S. Bluebook section of this catalog are shipped from Chicago unless a different f.o.b. point is shown.

Our eastern customers are urged to send their orders for supplies direct to Chicago rather than to our New York sales office in order to save time.

TERMS OF BUSINESS

Routing: Please give explicit shipping directions with each order, giving name of Freight, Express and Post Office stations. If no directions are given we will use our best judgment, but all goods travel at purchaser's risk.

Parcel Post: We will be pleased to send such items as can be mailed by Parcel Post; customers to remit for postage. We do not deliver any goods free at Wholesale Prices.

Disclaimer: The American Bulb Company and the American Florist Supply Company give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds (bulbs or plants) or florist supplies it sells and will not be responsible for the crop.

If the customer does not accept the goods on above terms he must return them at once, and money will be refunded or proper credit given. We exercise, however, the greatest care to fill our orders with the highest quality possible, as it is our constant aim to give our customers fullest satisfaction.

Cash Discounts: Cash with order only. 2% on Florist Supplies.

Otherwise, on bills for Florist Supplies, a discount of 2% for payment 10 days from date of bill may be deducted. Exception to the above is taken when goods are supplied under special quotation, in which case particular terms will be noted.

Prices: This list cancels all previous offers.

Unknown correspondents desiring to open an account will please furnish three references to parties in the trade with whom they have had credit relations, and sufficient time to investigate same; otherwise cash must accompany order.

Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance. We cannot arrange to send perishable stock C. O. D.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of order, and we reserve the right to advance prices without notice.

PEST and DISEASE CONTROL CHART

INSECT	CROP	CONTROL MEASURE	REMARKS	DISEASE	CROP	CONTROL MEASURE	REMARKS
Red spider	Any	Parathion bomb, spray, or dust.	Parathion in the presence of sulfur causes leafdrop on roses. Parathion bombs not recommended on chrysanthemum flowers.	Damping-off	Any	Arsan.	Treat seeds — light covering only.
		TEPP bomb or spray. Dithion bomb or smoke generator.				Fermate, Zerlate, or Parzate.	Destroy diseased seedlings or cuttings and dust lightly to prevent spread.
		Ovotran (K-6451) bomb or spray.	The 50% wettable powder can be painted on steam pipes using 1 lb. per 100,000 cu. ft. Vents should be closed 6-8 hours, temperature range 60°-85° F.			Steam sterilize soil mixture and pots.	Avoid injury to stems of seedlings or cuttings when potting or planting.
		Sodium selenate on tolerant crops.	Carnations, mums, asters, snapdragons, cyclamen, and St. Paulia.	Black spot	Roses	1 lb. Fermate per 100 gal. with Santomerse S 1-2000.	Avoid splashing water on foliage. Regular spraying necessary.
		Aramite spray.	Use 1 1/4 lbs. of the 15% wettable powder per 100 gal. plus a spreader and thoroughly cover the plant. Non-poisonous to humans, and has a long residual action on the plant.		Chrysanthemum English Ivy	1 lb. Fermate, Zerlate, or Parzate per 100 gal. with Santomerse S 1-2000.	Avoid splashing water on foliage.
		Dimite spray.	Use at 1-1200 or 1-1600; stronger dilutions usually cause injury.	Mildew	Calendula Chrysanthemum Hydrangea Rose Saintpaulia	6-8 oz. Iscothan per 100 gal. with Santomerse S 1-2000.	May cause yellow spotting on some rose varieties.
		Rotenone sprays.	Less effective than any of the above and the oil in which it is dissolved may cause damage to some plants.			Wettable sulfur sprays with Santomerse S 1-2000. Sulfur dust.	Often bleaches flowers. Parathion and sulfur together cause leafdrop on roses.
Thrips	Any, inside or outside	Parathion, BHC, DDT.	Parathion and DDT injure Kalanchoe and some other succulents.			Greenol, Fungtrogen, Grape and Rose dust, Malachite green.	
		5% DDT dust.		Root rot and Soft rot	Calla	2 oz. wettable Spergon in 1 gal. water. Soak 3 hours.	Cut off all rotted portions of bulb before soaking. Steam sterilize soil and pots. Plant bulbs immediately after soaking treatment.
		Corrosive sublimate, Lysol, formaldehyde.	Bulb disinfectants.			1 lb. New Improved Ceresan per 50 gal. water. Soak 1 hour.	
Aphids	Any	Parathion bomb, spray, or dust. Dithion bomb or smoke generator. TEPP bomb or spray. BHC spray or dust. Nicotine and soap spray or nicotine fumigation. Rotenone spray or dust.				Formaldehyde 1-50. Soak 1 hour.	
				Leafspots and foliage blights (bacterial and fungus)	Aster Azalea Begonia Carnation Chrysanthemum Cyclamen English Ivy Gardenia Geranium Hydrangea	Fermate, Zerlate, or Parzate sprays or dusts. Avoid splashing water on foliage. Give plenty of space and air.	Discard badly infected plants. On English ivy it is reported that a soil reaction near pH 5.0 reduces leafspot.
Leaf roller Mum midge White fly Leafhopper Ants Scale Tarnished plant bug	Any	DDT or Parathion.	Chlordane for ants. Dithion bomb or smoke, generator for soft brown scale.	Botrytis blight	Lily	Fermate, Zerlate, or Parzate spray with Santomerse S 1-2000. Avoid splashing water on foliage.	Appears as black or brown areas, half moon-shaped near tip of leaf. May also be due to insufficient fertilization with nitrogen or too acid a soil.
Mealybugs	Any	Parathion bomb or spray.	Repeated applications necessary. Not recommended on poinsettias after they show color.			Carnation Chrysanthemum Snapdragon	High humidity favors its development. Use some heat and ventilation even in mild weather. Fungicide sprays spot the petals—flowers unsalable.
		TEPP or Dimite sprays.	Use Santomerse S 1-2000 as a spreader for better effectiveness.	Rust	Aster Carnation Chrysanthemum Snapdragon	Fermate, Zerlate, or Parzate sprays with Santomerse S 1-2000. Wettable sulfur with Santomerse S 1-2000. Sulfur dust.	Avoid splashing water on foliage.
Grasshoppers	Any	Chlordane dust or spray.		Root nematode	Any	Steam sterilize soil, pots, and bench area where infected potted plants were grown.	On ground beds without a bottom, complete control will be impossible to attain.
Slugs Snails Cutworms Sowbugs	Any	Snarol.	DDT dust for sowbugs.			Dow MC-2.	Follow directions of manufacturer.
Leafminer and Foliar nematode	Chrysanthemum	Parathion spray.	Repeated applications necessary.	Stunt	Chrysanthemum	Discard stock, including diseased and "apparently healthy" plants. Buy stunt-free plants.	A virus which is slow to show symptoms. Apparently healthy plants may have stunt in them.
		Sodium selenate.				Re-establish root action by carrying on the dry side and apply iron sulfate at 1 oz. per 2 gal. Acid peat desirable in soil mixture.	May be caused by high pH, overwatering, root nematodes, symphyliids.
Rose midge and Strawberry root worm	Rose	Nicotine 1-200 & soap.	Usually burns the foliage.	Chlorosis	Azalea Gardenia Hydrangea	Often caused by high nitrates. Leach or apply a mulch of chopped straw or ground corncobs. If due to high soluble salts, leach thoroughly.	Soil testing is useful in preventing this.
		DDT. Three sprays of wettable powder on plants, soil, and walks 10 days apart.	Pinch and destroy heavily infested shoots.	Mosaic	Any	Destroy badly infected plants.	A virus disease which causes yellowish streaks or blotches to appear on foliage. Often spread by aphids or leafhoppers. Keep them under control.
Mite	Begonia Cyclamen English Ivy Saintpaulia Snapdragon	Parathion spray.	Repeated applications necessary. Usually injures cyclamen severely.				
		TEPP or Dimite sprays.	Repeated applications necessary. Avoid undue wetting of soil with TEPP.				
		Rotenone & nicotine spray.	Repeated applications necessary—as often as every 5-7 days.
